/30 cont./

865 4. The child should adopt certain habits in the conduct of his relations with his parents and relatives: to listen submissively to remarks without a haughty reply or showing unwillingness to carry out orders or making gestures that might appear arrogant; never to give a rude answer to whoever gives them orders about their work; never to answer discourteously nor in a way to show displeasure or arrogance when reprehended or punished nor to run away in these circumstances, as then the punishment would be greater; never to use bad words in Spanish as that implies a double offense: that of making use of a foreign language as well as bad words as such, besides coarseness and insults between adults lead to the compensation payment, which (as all of these social payments do) falls on the relatives. /31/

5. Besides aggressive acts toward his elders, we have those that can occur with his playmates or his own relatives and which acquire a more serious character when they affect his friends from other clans, and when from the verbal offense -- which may also have to be compensated -- they pass to fighting, because if blood should be shed the mother of the injured boy will make her claim for compensation payment (unless both combatants are hurt, in which case it is cancelled). In these cases of bloodshed, as will be seen hereafter, the relative social and economic strength or weakness of each of the clans to which the combatants belong is an important factor, as the stronger group always imposes its interpretation of justice on the weaker. These are the reasons that compel the mother to try to prevent her children from playing with those of another clan to forestall such possible claims. In spite of this, however, the boys escape her vigilant eye, ignore her orders, and manage to get together in most of their boyish activities. The prohibition to join up with boys of another clan develops also from the fact that if a boy is invited to join another group and some accident should occur, the responsibility will fall on the group of the boy who extended the invitation.

865 593 The relationship between siblings is usually peaceful especially between those of the same sex. They readily become comrades.

[126 cont.]
of war to the death will result between the clans affected.

One has to take into account the fact that a woman who has been bought for wife is relatively valuable, and the native is not always in a position to accumulate the number of animals sufficient to pay for her, although it is considered an obligation on the part of his relatives to assist him when the time for his marriage arrives. As prostitution is so limited because of the condition of inferiority in which it places the woman who traffics in sex, the situation of the unmarried male in this respect is difficult. We repeat again that we make this statement on the basis of the facts of La Guajira social customs in normal times, and not on the basis of the present period when they are suffering from ever increasing problems of hunger, poverty, and acculturation, phenomena which are overthrowing all their traditional institutions.

Presenting the question in these terms, one can appreciate the trying position of the bachelor Guajiro native who is without slaves and without economic resources to enable him to buy a wife. He lives within a regimen of limitations and restrictions which reach even to sexual taboos which can be divided into two classes: special cases, especially applicable to the sex life of shamans, as we have seen; and general cases, applicable to the whole community and which go to the extreme of provoking curious euphemisms in the language when the word for the genital organ is phonetically similar to some other word, as in the case with the word for dog.

These restrictions must be considered in the totality of the social norms, but this is not the moment to expound on them as they will be fully covered in this review as an interpretation of the whole of Guajiro society. However, we wish to point out their presence in the Dance of the Kid, or better said their absence, since, as we have said, these restrictions disappear, and there is complete sexual freedom which permits the minstrel to caress the young maids on the pretext of deciding their virginity or loss of it, a thing that in normal times would not be permitted, and to go to the extreme of countenancing carnal union without economic or social consequences, the only
